Deliverable: Business Insights Report

Date of Submission: September 2026

Executive Summary

This report provides a comprehensive performance review of the retail organization across the three-year period (2021–2023). Utilizing Microsoft Power BI, raw transaction and master data were cleaned, modeled in a Star Schema, and analyzed through interactive dashboards to answer core business questions regarding revenue, profitability, product mix, salesforce productivity, and budget compliance.

Section 1: Answers to Management Questions

1. Business Performance

1. What is the total revenue?

Total revenue generated across the three years (2021 to 2023) is **\$26 Million**.

2. What is the total profit?

The total gross profit generated by the business is **\$8 Million**.

3. What is the overall profit margin?

The overall profit margin for the organization is **32.52%**, showing healthy underlying profitability.

4. Is revenue growing year over year?

Yes, the business demonstrated strong expansion between 2021 and 2022, recording a Year-over-Year (YoY) sales growth of **+76.58%**.

5. Which year performed best?

2021 was the highest full-calendar revenue contributor generating approximately **\$13.4 Million**, followed closely by **2022** with **\$11.8 Million**. (Note: 2023 reflects partial-year / YTD reporting).

2. Products

6. Which are the top 10 products by revenue?

The top 10 revenue-generating products are: **Product 63, Product 28, Product 47, Product 29, Product 84, Product 59, Product 56, Product 66, Product 33, and Product 81**.

7. Which are the top 10 products by profit?

Profit leaders closely match revenue leaders, anchored primarily by **Product 63, Product 28, and Product 47**.

8. Which products have poor margins?

Lower-end SKUs such as **Product 79** exhibit margins below 15%–20%, yielding weak bottom-line contributions despite sales activity.

9. Which products have the highest demand?

Product 63 and Product 28 registered the highest unit sales velocity, moving over 250 units each.

3. Customers

10. Who are the top 10 customers?

The top 10 customers by purchase value are: **Jesse Hill, Thomas Gonzales, Fred Russell, Philip Bailey, Keith Stephens, Aaron Miller, William Medina, David Mendoza, James Armstrong, and Raymond Alexander**.

11. What percentage of sales comes from the top customers?

The top 10 customers account for approximately 7% of total sales, demonstrating high customer diversity and low single-account churn vulnerability.

12. Which customers generate the highest profit?

Jesse Hill and **Thomas Gonzales** generated the highest total profit, aligning directly with their leading order volume.

4. Sales Team

13. Who is the best-performing salesperson?

Ryan Welch is the top-performing salesperson, generating over **\$700,000** in revenue.

14. Who generated the highest profit?

Ryan Welch achieved the highest profit contribution, followed by **Scott Mason** and **Roger Ramos**.

15. Which salesperson has the highest order volume?

Ryan Welch handled the greatest number of transactions, closing over **260 orders**.

5. Geography

16. Which state generates the highest revenue?

California is the primary state market, accounting for all recorded retail sales (**\$26 Million**).

17. Which locations are underperforming?

Secondary regional outlets with low population densities record low transaction volumes and continuous negative budget variance.

18. Which locations appear to have growth potential?

Metropolitan centers such as **Anaheim, Bakersfield, and Fresno** possess high resident counts but relatively low sales penetration, offering immediate expansion upside.

6. Budget vs Actual

19. Is the organization achieving its budget?

Yes, cumulative actual sales exceeded the company's annual budget benchmarks.

20. Which locations exceeded the budget?

Major metropolitan stores including **Los Angeles, San Diego, and San Jose** significantly exceeded budgeted expectations.

21. Which locations missed the budget?

Smaller regional stores registered negative variances and fell short of monthly benchmarks.

22. Which months had the largest budget variance?

January and February posted the largest positive budget variance, exceeding monthly targets by more than 30%.

7. Strategic Insights

23. What are the three biggest strengths of the business?

- Strong profit margin of **32.52%**.
- Healthy, well-diversified customer base with zero single-account dependency.
- Proven flagship products (Product 63 & Product 28) with durable market demand.

24. What are the three biggest areas of concern?

- Total geographic concentration in California without interstate diversification.
- Sales volume deceleration during 2023 requiring pipeline re-evaluation.
- A wide performance gap between top-quartile and bottom-quartile sales reps.

25. What recommendations would you give management?

- Expand sales and distribution into neighboring states (Nevada, Arizona).

- Implement peer sales coaching led by top performers like Ryan Welch.
- Bundle or re-price products with margins below 20% to safeguard gross margin.

Section 2: Business Insights and Strategy

Top 5 Key Findings

1. **Consistent Profit Engine:** The business converted \$26M in sales into \$8M gross profit at a reliable 32.52% margin.
2. **Flagship Product Concentration:** The top 10 products drive ~30% of total revenue, confirming high customer alignment around flagship offerings.
3. **Sales Team Productivity Spread:** Top salespeople sell more than 3x the volume of lower-quartile reps, demonstrating a clear coaching opportunity.
4. **High-Population Market Gaps:** Multiple densely populated California cities show disproportionately low sales penetration.
5. **Low Account Dependency:** The top 10 customers represent only ~7% of sales, eliminating insolvency risk from single-client churn.

Top 5 Business Problems Identified

1. **Geographic Concentration Risk:** 100% dependency on California exposes revenue to local economic or regulatory shifts.
2. **2023 Revenue Softening:** Annual order volumes moderated in 2023 compared to peak 2021/2022 performance.
3. **Margin Drag from Low-Tier SKUs:** Several bottom-tier products have margins below 15%, consuming warehouse footprint for minimal profit.
4. **Sales Rep Execution Disparity:** Over 25% of sales reps fall significantly below the corporate Average Order Value (AOV) benchmark of \$2,360.
5. **Location Metadata Gaps:** Incomplete geographic tags on occasional sales records limit granular local reporting.

Top 5 Strategic Recommendations

1. **Interstate Regional Expansion:** Establish distribution partnerships in neighboring growth markets (Nevada, Arizona) to de-risk geographic focus.
2. **Sales Mentorship & Enablement:** Pair lower-performing reps with Ryan Welch and Scott Mason; focus on upselling higher-margin items.
3. **SKU Optimization:** Reprice or bundle products with margins below 20% to improve overall product portfolio returns.

4. **Targeted City Marketing Campaigns:** Allocate local promotional budgets specifically toward high-population, low-penetration cities like Fresno and Bakersfield.
5. **Quarterly Rolling Budgeting:** Adopt dynamic quarterly forecasts that adjust realistically for seasonality and historical run rates.

Section 3: Technical Architecture & Methodology

- **ETL (Power Query):** Cleaned and appended annual sales files (2021–2023), enforced consistent typing, removed duplicates, and unified into Fact_Sales.
- **Data Model:** Configured a single-direction 1-to-many Star Schema connecting Fact_Sales to Dim_Product, Dim_Location, Dim_Customer, Dim_Salesperson, and Dim_Date.
- **DAX Measures:** Developed dynamic measures utilizing CALCULATE, DIVIDE, TOTALYTD, SAMEPERIODLASTYEAR, and RANKX.
- **Dashboards:** 7 dedicated pages supporting executive overview, time intelligence, product profiling, customer segmentation, sales team evaluation, geographic analysis, and financial budget tracking.
